For Dr. Schwartz, a successful result is when a patient looks in the mirror and sees the image they have of themselves in their mind's eye looking back at them. "For some patients, that may entail the softening of a feature; for others, it encompasses seeing a reflection of the youth they have inside, instead of a tired and weary look." Dedicated to providing the highest-quality medical care, Dr. Schwartz seeks outstanding results that bring out the natural beauty and vitality already present in his patients. "I evaluate the patient's entire facial harmony and adapt as many techniques as necessary to achieve a custom result for each patient," explains Dr. Schwartz, regarded for his highly personalized approach.

There is a lot of truth in the saying that "You only get one chance to make a first impression." Whether you are re-entering the job market or trying to make new social connections, in today's economy how you first present yourself is more important than ever. "An investment in making your face look fresh and vibrant will pay big dividends," says Dr. Schwartz. As a specialist in facial cosmetic procedures, Dr. Schwartz can give you the confidence to rejuvenate your inner and outer beauty. "Trust your face to a facial plastic surgeon who has the training and skill, because it's the first thing people are going to see. Make it the best!"

"I want to educate my patients to choose what's right for their face, not just what may be the current trend."

—MICHAEL L. SCHWARTZ, MD, FACS

## WHAT THE EXPERT SAYS

"A great rhinoplasty can change a person's outlook on life, restoring self-confidence to achieve a 'can-do anything' type of mentality. This is true not only in young adults, but also in more mature patients who have been bothered by this aspect of their appearance," says Dr. Schwartz.

INSIDE INFORMATION

## THE SECRET TO NATURAL-LOOKING NOSE JOBS

"You can spot a bad **RHINOPLASTY** by a conventional 'nose job look,' essentially because the patient had large amounts of bone or cartilage removed," says Dr. Schwartz of his natural-looking rhinoplasties that adhere to a customized, meticulous approach achieving a soft, genuine appearance. "My approach is different. With my technique, there are **MINIMAL INCISIONS** and **TYPICALLY LESS BRUISING**, because I reshape rather than remove the existing facial structures." Additionally, he explains, "My patients tend to recover more quickly and have much less of an operated look. People often tell them, 'You look different, but I can't quite put my finger on what's changed.' It's because they are drawn to the beauty of the patient's eyes, not the prominence of an unbalanced nose." Such is the typical outcome with each procedure he performs, as he preserves as much of the normal underlying tissue, cartilage and bone as possible, yielding subtle results that complement existing features. "I take pride in my work," says the respected surgeon. "I am **CONSERVATIVE** and extremely exact in my technique to ensure my results are beautifully aesthetic and natural. My patients have said they really appreciate my dedication."
